Phone Setup

Typically, your administrator sets up your phone and connects it to the network. If your phone is not setup and connected, contact your administrator for instructions.

Adjust the Handset Rest

If your phone is wall-mounted or if the handset slips out of the cradle too easily, you may need to adjust the handset rest to ensure that the receiver does not slip out of the cradle.
Procedure

Step 1 Remove the handset from the cradle and pull the plastic tab from the handset rest.
Step 2 Rotate the tab 180 degrees.
Step 3 Hold the tab between two fingers, with the corner notches facing you.
Step 4 Line up the tab with the slot in the cradle and press the tab evenly into the slot. An extension protrudes from the top of the rotated tab.
Step 5 Return the handset to the handset rest.

Change the Viewing Angle of Your Phone

You can change the angle of the phone to eliminate glare on the screen.

Procedure

Step 1 Unplug the phone from the network.
Step 2 Place the phone so that the keypad faces the desktop.
Step 3 Grasp one side of the footstand with one hand and place your other hand on the phone.
Step 4 Hold down the phone and pull up on the footstand.
Step 5 Turn the footstand over.
Step 6 Push the footstand back into the phone until the stand locks into place.
Step 7 Place the phone upright and plug it into the network.
Connect to the Network

Your phone needs to be connected to the telephone network.

- Wired connection—The phone is plugged into the network using an Ethernet cable.
- Mobile and Remote Access through Expressway—After the phone is connected to the network, it is set up to automatically connect to the Expressway server.

Connect to Expressway

You can connect into your corporate network when you are working away from your office using Mobile and Remote Access Through Expressway.

When your phone detects that it is not at the office, you are prompted to connect to your corporate network through Expressway.

Before You Begin

If you have been using your phone at the office or with a VPN, reset your service mode before you connect to Expressway.

If you need to connect to Mobile and Remote Access Through Expressway on-premise, restart your phone and press Select when prompted.

Procedure

Step 1 Enter your activation code or service domain on the Welcome screen.
Step 2 Enter your username and password.
Step 3 Press Submit.

Activate and Sign Into Your Phone

You may need to activate your phone or sign into your phone. Activation happens once for your phone, and connects the phone to the call control system. Your administrator gives you your sign in and activation credentials.

Sign into Your Phone

Before You Begin

Get your userid and PIN or password from your administrator.
Procedure

**Step 1** Enter your user ID in the **Userid** field.
**Step 2** Enter your PIN or password in the **PIN** or **Password** field.
**Step 3** Press **Submit**.

**Sign into Your Extension from Another Phone**

You can sign into a different phone in your network and have it act the same as your phone with Cisco Extension Mobility. After you sign in, the phone adopts your user profile, including your phone lines, features, established services, and web-based settings.

**Before You Begin**

Get your user ID and PIN from your administrator.

**Procedure**

**Step 1** Press **Applications**.
**Step 2** Select **Extension Mobility** (name can vary).
**Step 3** Enter your user ID and PIN.
**Step 4** If prompted, select a device profile.

**Sign out of Your Extension from Another Phone**

**Procedure**

**Step 1** Press **Applications**.
**Step 2** Select **Extension Mobility**.
**Step 3** Press **Yes** to sign out.

**Self Care Portal**

You can customize some phone settings with the Self Care portal web site, which you access from your computer. Your administrator gives you the Self Care portal URL, your user ID, and password.

In the Self Care portal, you can control features, line settings, and phone services for your phone.
Phone features include speed dial, do not disturb, and your personal address book.

Line settings affect a specific phone line (directory number) on your phone. Line settings can include call forwarding, visual and audio message indicators, ring patterns, and other line-specific settings.

Phone services can include special phone features, network data, and web-based information (such as stock quotes and movie listings). You must subscribe to a phone service using the Self Care portal before you access it on your phone.

The following table describes some specific features that you configure using the Self Care portal. For more information, see the Self Care portal documentation for your call control system.

<table>

</thead>
<tbody>
<tr>
<td>Call forward</td>
<td>You specify the number that will receive calls when call forward is enabled on the phone. You can use the Self Care portal to set up more complicated call forward functions, for example, when your line is busy.</td>
</tr>
</tbody>
</table>
| Additional phones | You specify additional phones (your mobile and other phones) that you want to use to make and receive calls with the same directory numbers as your desk phone. You can also define blocked and preferred contacts to restrict or allow calls from certain numbers to be sent to your mobile phone. When you set up additional phones, you can also set up the following features:  
  • Single number reach—You specify if the additional phone should ring when someone calls your desk phone.  
  • Mobile calls—if the additional phone is a mobile phone, you can set it up to allow you to transfer mobile calls to your desk phone or desk phone calls to your mobile phone. |
| Speed dial        | You assign phone numbers to speed-dial numbers so that you can quickly call that person.                                                     |

Speed-Dial Numbers

When you dial a number on your phone, you enter a series of digits. When you set up a speed-dial number, the speed-dial number must contain all the digits you need to make the call. For example, if you need to dial 9 to get an outside line, you put the number 9 and then the number you want to dial.

You can also add other dialed digits to the number. Examples of additional digits include a meeting access code, an extension, a voicemail password, an authorization code, and a billing code.

The dial string can contain the following characters:

- 0 to 9
• pound (#)
• asterisk (*)
• comma (,)—This is the pause character, and gives a 2-second delay in the dialing. You can have several commas in a row. For example, two commas (,,) represent a pause of 4 seconds.

The rules for dial strings are:
• Use the comma to separate the parts of the dial string.
• An authorization code must always precede a billing code in the speed-dial string.
• One comma is required between the authorization code and the billing code in the string.
• A speed-dial label is required for speed dials with authorization codes and additional digits.

Before you configure the speed dial, try to dial the digits manually at least once to ensure that the digit sequence is correct.

Note
Your phone does not save the authorization code, billing code, or extra digits from the speed dial in the call history. If you press Redial after connecting to a destination using speed dial, the phone prompts you to enter any required authorization code, billing code, or additional digits manually.

Example
To set up a speed-dial number to call a person at a specific extension, and if you need an authorization code and billing code, consider the following requirements:
• You need to dial 9 for an outside line.
• You want to call 5556543.
• You need to input the authorization code 1234.
• You need to input the billing code 9876.
• You must wait for 4 seconds.
• After the call is connected, you must dial the extension 56789#.

In this scenario, the speed dial number is 95556543,1234,9876,,56789#.

Buttons and Hardware
The Cisco IP Phone 7800 Series has distinct hardware types:
• Cisco IP Phone 7811—No buttons on either side of the screen
• Cisco IP Phone 7821—Two buttons on the left side of the screen
• Cisco IP Phone 7841—Two buttons on either side of the screen
• Cisco IP Phone 7861—16 buttons at the right edge of the phone

The following figure shows the Cisco IP Phone 7841.

**Figure 1: Cisco IP Phone 7800 Series Buttons and Features**

</tbody>
</table>
| 5 | **Hold/Resume, Conference, and Transfer** | Hold/Resume — Place an active call on hold and resume the held call.  
Conference — Create a conference call.  
Transfer — Transfer a call. |
| 6 | **Speakerphone, Mute, and Headset** | Speakerphone — Toggle the speakerphone on or off. When the speakerphone is on, the button is lit.  
Mute — Toggle the microphone on or off. When the microphone is muted, the button is lit.  
Headset — Toggle the headset on or off. When the headset is on, the button is lit.  
The Cisco IP Phone 7811 does not have a Headset button. |
| 7 | **Contacts, Applications, and Messages** | Contacts — Access personal and corporate directories.  
Applications — Access call history, user preferences, phone settings, and phone model information.  
Messages — Autodial your voice messaging system. |
| 8 | **Volume button** | Adjust the handset, headset, and speakerphone volume (off hook) and the ringer volume (on hook). |

**Navigation**

You use the outer ring of the Navigation cluster to scroll through menus. You use the inner Select button of the Navigation cluster to select menu items.

Each item in a menu has an index number. You can enter the index number with the keypad to select the menu item.
Softkey, Line, and Feature Buttons

You can interact with the features on your phone in several ways:

- Softkeys, located below the screen, let you do even more with your phone. They change depending on what you are doing at the time. The ... softkey means that more softkeys are available.
- Feature and line buttons, located on either side of the screen, give you access to phone features and phone lines.
  - Feature buttons—Used to view calls on a line or access features such as Speed Dial.
  - Line buttons—Used to answer a call or resume a held call. When not used for an active call, used to initiate phone functions, such as the missed calls display.

Feature and line buttons illuminate to indicate status:

- Green, steady—Active call or two-way intercom call
- Green, flashing—Held call
- Amber, steady—Privacy in use, one-way intercom call, Do Not Disturb (DND) active, or logged into a Hunt Group
- Amber, flashing—Incoming call or reverting call
- Red, steady—Remote line in use (shared line or Line Status)
- Red, flashing—Remote line on hold

Your administrator can set up some functions as softkeys or as feature buttons. You can also access some functions with softkeys or the associated hard button.

Phone Screen Features

The phone screen shows information about your phone such as directory number, active call and line status, softkeys, speed dials, placed calls, and phone menu listings. The screen is made up of three sections: the header row, the middle section, and the footer row.

Figure 2: Cisco IP Phone 7800 Screen
At the top of the screen is the header row. The header row displays the phone number, current date and time, as well as a number of icons. The icons display when features are active.

The middle of the phone screen displays the information associated with the line and feature buttons on the phone.

The bottom row of the screen is the softkey labels. Each label indicates the action for the softkey button below the screen.

### Clean the Phone Screen

**Caution**

Do not use any liquids or powders on the phone because they can contaminate phone components and cause failures.

**Procedure**

Wipe the screen with a soft, dry cloth.

### Differences Between Phone Calls and Lines

We use the terms *lines* and *calls* in very specific ways to explain how to use your phone. Here is an explanation of the differences.

- **Lines**—Each line corresponds to a directory number or intercom number that others can use to call you. To see how many lines you have, look at the right side of your phone screen. You have as many lines as you have directory numbers and phone line icons.

- **Calls**—Each line can support multiple calls. By default, your phone supports four connected calls per line, but your administrator can adjust this number according to your needs.

  Only one call can be active at any time; other calls are automatically placed on hold.

Here is an example: If you have two lines and each line supports four calls, then you could have up to eight connected calls at one time. Only one of those calls is active and the other seven are held calls.

### Power Requirements

The following Cisco-approved power adaptors must be used with the Cisco IP Phone 7800 Series:

- Phihong adapter (PSC18U-480); Rating: 48 VDC 0.38A
- Delta adapter (EADP-18VB B); Rating: 48 VDC 0.375A

### Energy Savings

Your administrator can reduce the amount of power used by the phone screen when you're not using your phone. There are two levels of energy-saving that can be set up:
• Power Save—The backlight or screen turns off when the phone has been inactive for a period of time. You can manage the backlight.

You can manage the backlight for the Cisco IP Phone 7800 Series.

• Power Save Plus—At the scheduled time, the phone turns off. The phone screen turns on again at a scheduled time. Your administrator sets up the power off and on times, based on your normal work schedule. If your requirements change (for example, your work hours or work days change), contact your administrator to have your phone reconfigured.

Ten minutes before the scheduled power off time, the Select button lights up and you receive a message that your phone will power off at a specific time. You also hear your phone ring four times at 10 minutes, 7 minutes, and 4 minutes before the power off time. Thirty seconds before power off, the phone rings 15 times.

If your phone is active (for example, on a call), your phone waits until it has been inactive for a period of time before telling you of the pending power shutdown.

---

**Note**
The Cisco IP Phone 7811 does not support Power Save or Power Save Plus.

---

**Related Topics**

- [Adjust the Phone Screen Backlight](#), on page 56

---

**Power On Your Phone**

When your phone is powered off to save energy, the phone screen is blank and the Select button is lit with a white light.

**Procedure**

Press Select.

---

**Additional Help and Information**

If you have questions about the functions available on your phone, you should contact your administrator. The Cisco web site ([http://www.cisco.com](http://www.cisco.com)) contains more information about the phones and call control systems.

- For quick start guides and end-user guides in English, follow this link:
  

- For guides in languages other than English, follow this link:
  

- For licensing information, follow this link:
Accessibility Features

Cisco IP Phones provide accessibility features for the vision impaired, the blind, and the hearing and mobility impaired.

You can also find more information about accessibility at this Cisco website:

http://www.cisco.com/web/about/responsibility/accessibility/index.html

Troubleshooting

Sometimes you can have problems with call quality or problems such as calls that unexpectedly drop or features that suddenly do not work as expected. These issues may be related to the following scenarios:

- Your phone cannot communicate with the call control system.
- The call control system has communication or internal problems.
- Your phone has internal problems.

If you experience problems, your administrator can assist in troubleshooting the root cause of the problem.

Find Information About Your Phone

Your administrator may ask for information about your phone. This information uniquely identifies the phone for troubleshooting purposes.

Procedure

Step 1  Press Applications.
Step 2  Select Phone information.
Step 3  (Optional) Press Show detail to view the upgrade process during an upgrade.
Step 4  Press Exit to return to the Applications screen.

Report Call Quality Issues

Your administrator may temporarily configure your phone with the Quality Reporting Tool (QRT) to troubleshoot performance problems. Depending on configuration, use the QRT to:

- Immediately report an audio problem on a current call.
Select a general problem from a list of categories and choose reason codes.

**Procedure**

**Step 1** Press **Report quality**.
**Step 2** Scroll and select the item that closely matches your problem.
**Step 3** Press the **Select** softkey.
The information is sent to your system administrator.

**Report All Phone Issues**

You can use the Cisco Collaboration Problem Report Tool (PRT) to collect and send phone logs, and to report problems to your administrator. If you see a message that the PRT upload has failed, the problem report is saved on the phone and you should alert your administrator.

**Procedure**

**Step 1** Press **Applications**.
**Step 2** Select **Phone information > Report**.
**Step 3** Enter the date that you experienced the problem in the **Date of problem** field. The current date appears in this field by default.
**Step 4** Enter the time that you experienced the problem in the **Time of problem** field. The current time appears in this field by default.
**Step 5** Select **Problem description**.
**Step 6** Select a description from the displayed list.
**Step 7** Press **Submit**.

**Lost Connectivity**

Sometimes, your phone can lose its connection to the call control system for a variety of reasons. When this connection is lost, you see an alert message on your phone screen.

If you are on an active call when the connection is lost, the call still continues. However, you do not have access to all the normal phone functions because some of these functions require information from the call control system. Some functions will not display on the softkeys, while pressing other buttons may result in no action.

When the phone reconnects to the call control system, your normal phone functions become available again.
Cisco One-Year Limited Hardware Warranty Terms

Special terms apply to your hardware warranty and services that you can use during the warranty period. Your formal Warranty Statement, including the warranties and license agreements applicable to Cisco software, is available on Cisco.com at the following URL: http://www.cisco.com/go/hwwarranty.

Make Calls

Your Cisco IP Phone works just like a regular phone. But we make it easier for you to make calls.

Make a Call

Procedure

Enter a number and pick up the handset.
Make a Call with the Speakerphone

Procedure

Step 1
Enter a number using the keypad.

Step 2
Press Speakerphone.

Make a Call with a Headset

Procedure

Step 1
Plug in a headset.

Step 2
Enter a number using the keypad.

Step 3
Press Headset.

Redial a Number

You can call the most recently dialed phone number.

Procedure

Step 1
(Optional) Select a line.

Step 2
Press Redial.

Speed Dial

You can assign buttons or codes to quickly dial the numbers of people you call often. Before you can use speed-dial features on your phone, set up speed dial in the Self Care Portal.

Depending on your setup, your phone can support these features:

- Speed-dial buttons—Dial a phone number from one or more line buttons set up for speed dialing.
- Speed-dial codes—Dial a phone number from a code (sometimes referred to as abbreviated dialing).
Related Topics
    Self Care Portal, on page 5
    Speed-Dial Numbers, on page 6

Make a Call with a Speed-Dial Button

Before You Begin
Set up speed-dial codes in the Self Care portal.

Procedure

Press a speed-dial button.

Related Topics
    Self Care Portal, on page 5

Make a Call With a Speed-Dial Code

Before You Begin
Set up speed-dial codes on the Self Care portal.

Procedure

Enter the speed-dial code and press Speed Dial.

Related Topics
    Self Care Portal, on page 5

Make a Call With a Fast-Dial Button

Before You Begin
You need to set up the fast-dial codes in your personal directory.

Procedure

Step 1  Press Fast Dial.
Step 2  Sign in to Personal Directory.
Step 3  Select Personal Fast Dials.
Step 4  Select a fast-dial code and then press the Dial softkey.
Dial an International Number

You can dial international calls when you prefix the phone number with a plus (+) sign.

Procedure

**Step 1** Press and hold star (*) for at least 1 second.

The plus (+) sign is displayed as the first digit in the phone number. The tone changes to indicate that the * has changed to a + sign. You hear the tone if you are off-hook.

**Step 2** Dial the number.

Ten seconds after the last key press, the phone dials the number.

Get Notified when a Contact is Available

If you call someone and their line is busy or they do not answer, you can be notified with a special ringtone when they are available.

Procedure

**Step 1** Press Callback while you are listening to the busy tone or ring sound.

**Step 2** Press Exit to exit the confirmation screen.

**Step 3** When you hear the ringtone that the person is available, press Call to place the call again.

Calls That Require a Billing Code or Authorization Code

Your administrator may require that you enter a billing code or authorization code (or both codes) after you dial a phone number. The billing code, called a Client Matter Code, is used for accounting or billing purposes. The authorization code, called a Forced Authorization Code, controls access to certain phone numbers.

When a billing code is required, the phone displays Enter Client Matter Code, the dialed number changes to "*******", and you hear a special tone.

When an authorization code is required, the phone displays Enter Authorization Code, the dialed number changes to "*******", and you hear a special tone. For security reasons, the phone displays a "*" instead of the number entered.

When both a billing code and an authorization code are required, you are prompted for the authorization code first. Then you are prompted for the billing code.
Secure Calls

Your administrator can take steps to protect your calls from tampering by people outside your company. When you see a lock icon displayed on your phone during a call, your phone call is secure. Depending upon how your phone is configured, you may have to sign in before you call somebody or hear a security tone played over your handset.

Answer Calls

Your Cisco IP Phone works just like a regular phone. But we make it easier for you to answer calls.

Answer a Call

Procedure

Press the flashing amber line button.

Answer Call Waiting

When you have a call waiting while you are on an active call, you hear a single beep and the line button flashes amber.

The Cisco IP Phone 7811 does not support this feature.

Procedure

<table>
<thead>
<tr>
<th>Step 1</th>
<th>Press the line button.</th>
</tr>
</thead>
<tbody>
<tr>
<td>Step 2</td>
<td>(Optional) If you have more than one call waiting, select an incoming call.</td>
</tr>
</tbody>
</table>

Decline a Call

You can send an active or ringing call to your voicemail system or to a preset phone number. You can also silence the ringing call.

Procedure

Decline a call by performing one of the following actions:
• Highlight the incoming call and press **Decline**.
• Press **Volume** down once to silence the incoming (ringing) call, and then let the incoming call go to your voicemail or to a preset phone number.

**Turn On Do Not Disturb**

Use Do Not Disturb (DND) to silence your phone and ignore incoming call notifications when you need to avoid distractions.

When you enable DND, your incoming calls forward to another number, such as your voicemail, if it is set up.

When you enable DND, it affects all lines on your phone. However, you will always receive intercom and emergency calls, even when DND is turned on.

**Procedure**

<table>
<thead>
<tr>
<th>Step 1</th>
<th>Press <strong>Do not disturb</strong> to turn on DND.</th>
</tr>
</thead>
<tbody>
<tr>
<td>Step 2</td>
<td>Press <strong>Do not disturb</strong> again to turn off DND.</td>
</tr>
</tbody>
</table>

Self Care Portal, on page 5

**Answer a Coworker’s Phone (Call Pickup)**

If you share call handling tasks with your coworkers, you can answer a call that is ringing on a coworker’s phone. First, your administrator has to assign you to at least one call group.

**Answer a Call Within Your Group (Pickup)**

You can answer a call that rings on another phone within your call pickup group. If multiple calls are available for pickup, you’ll answer the call that has been ringing for the longest time.

**Procedure**

<table>
<thead>
<tr>
<th>Step 1</th>
<th>(Optional) Press the line button.</th>
</tr>
</thead>
<tbody>
<tr>
<td>Step 2</td>
<td>Press <strong>PickUp</strong> to transfer an incoming call within your pickup group to your phone.</td>
</tr>
<tr>
<td>Step 3</td>
<td>Press <strong>Answer</strong> to connect to the call when the call rings.</td>
</tr>
</tbody>
</table>
Answer a Call from Another Group (Group Pickup)

Group PickUp allows you to answer a call on a phone that is outside your call pickup group. You can use the group pickup number to pick up the call, or you can use the number of the phone line that is ringing.

Procedure

Step 1  (Optional) Press the line button.
Step 3  Do one of the following actions:
   - Enter the number of the phone line with the call that you want to pick up.
     For example, if the call is ringing on line 12345, enter 12345.
   - Enter the group pickup number.
Step 4  Press Answer to connect to the call when the call rings.

Answer a Call From an Associated Group (Other Pickup)

Procedure

Step 1  (Optional) Press the line button
Step 2  Press PickUp to answer a call in your pickup group or in a group that is associated with your phone.
Step 3  If the call rings, press Answer to connect to the call when the call rings.

Answer a Call within Your Hunt Group

You can use hunt groups to share the call load in organizations that receive many incoming calls.

Your administrator sets up a hunt group with a series of directory numbers. When the first directory number in the hunt group is busy, the system hunts for the next available directory number in the group. The system directs the call to that phone.

If you are a member of a hunt group, you sign in to a hunt group when you want to receive calls. You sign out of the group when you want to prevent calls from ringing on your phone.

Before You Begin

You must be signed into the hunt group to receive hunt group calls.
Answer Calls Automatically

If your phone is set up to automatically answer calls, then you don't need to do anything special when your phone rings. After one ring, you're automatically connected to the call using the speakerphone.

However, if you would rather use your headset to answer the call, you need to set it up first.

Note

The Cisco IP Phone 7811 does not support a headset.
Procedure

Step 1
Connect your headset to your phone.

Step 2
Make sure that the Headset button  lights up.

Step 3
When your phone automatically answers the incoming call, just talk to the caller using your headset.
If you don't want to use your headset anymore, press the Headset button to turn it off, and use the handset or speakerphone instead.

Trace a Suspicious Call

If you receive unwanted or harassing calls, use malicious call identification (MCID) to alert your administrator.
Your phone sends a silent notification message to your administrator with information about the call.

Procedure

Press MCID.

Mute Your Audio

Procedure

Step 1
Press Mute .

Step 2
Press Mute again to turn mute off.

Hold Calls

You can put an active call on hold and then resume the call when you're ready.

Put a Call on Hold

Procedure

Step 1
Press Hold .

Step 2
To resume a call from hold, press Hold again.
Answer a Call Left on Hold for Too Long

You can be notified when a call is left on hold. The notification is similar to an incoming call notification and includes these cues:

- Single ring, repeating at intervals
- Flashing amber line button
- Flashing message indicator on the handset
- Visual notification on the phone screen

Procedure

Press the flashing amber line button or Answer to resume the held call.

Swap Between Active and Held Calls

Procedure

Press Swap to switch to the held call.

Swap Between Active and Held Calls on the Cisco IP Phone 7811

The Cisco IP Phone 7811 does not have line buttons. If you have a held call and an active call, you see the Swap softkey. If you have more than two calls, you see the Calls softkey.

Procedure

Press Swap or Calls.

Call Park

You can use your phone to park (temporarily store) a call. You can then retrieve the call from another phone (such as a phone at a coworker’s desk or in a conference room).

There are two ways you can park a call: call park and directed call park. You'll only have one type of call park available on your phone.

If the call remains parked for too long, you receive an alert tone. You can answer the call or retrieve it from another phone. If you do not answer the call within a certain length of time, it is routed to another destination (such as voicemail), as set by your administrator.
Place a Call on Hold with Call Park

You can park an active call that you answered on your phone and then use another phone in the call control system to retrieve the call.

You can park only one call at the call park number.

Before You Begin

Your call must be active.

Procedure

Step 1
Press Park, and then hang up.
Your phone displays the number where the system parked the call. The parked call is put on hold, and you can press Resume to resume the call on your phone.

Step 2
(Optional) Communicate the parked number to the person who needs to answer the call.

Retrieve a Call on Hold with Call Park

You can pick up a parked call from anywhere in your network.

Before You Begin

You need the number that was used to park the call.

Procedure

Enter the number where the call is parked to retrieve the call.

Place a Call on Hold with Assisted Directed Call Park

You can park and retrieve an active call using a dedicated call park number. Using assisted directed call park, you use a button to park an active call. Your administrator sets up the button as a speed-dial line. With this type of directed call, you can use line status indicators to monitor the status of the line (in-use or idle).

Procedure

Press BLF Directed Call Park on a line that displays an idle line status indicator for an assisted directed call park.

Retrieve a Call on Hold with Assisted Directed Call Park

Procedure

Press BLF Directed Call Park.
Place a Call on Hold with Manual Directed Call Park

You can park and retrieve an active call using a dedicated call park number. Using manual directed call park, you transfer an active call to a directed call park number, which your administrator sets up.

Procedure

Step 1 Press Transfer.
Step 2 Enter the directed call park number.
Step 3 Press Transfer again to park the call.

Retrieve a Call on Hold with Manual Directed Call Park

You can pick up a call that was parked to a dedicated call park number.

Before You Begin

You need the directed call park number and the park retrieval prefix.

Procedure

Step 1 Dial the park retrieval prefix.
Step 2 Dial the directed call number.

Forward Calls

You can forward calls from any line on your phone to another number. Call forward is phone-line specific. If a call reaches you on a line where call forwarding is not enabled, the call rings as usual.

There are two ways of forwarding your calls:

- Forward all calls
- Forward calls in special situations, such as when the phone is busy or there is no answer.

Verify that your calls are forwarded by looking for the Forward all icon in the line label.
Transfer Calls

You can transfer an active call to another person.

Transfer a Call to Another Person

When you transfer a call, you can stay on the original call until the other person answers. This gives you an opportunity to talk privately with the other person before removing yourself from the call. If you don't want to talk, then transfer the call without waiting for the other person to answer.

You can also swap between both callers to consult with them individually before removing yourself from the call.

Consult Before You Complete a Transfer

Before you transfer a call, you can talk to the person that you're transferring the call to. You can also swap between that call and the call that you're transferring, before you complete the transfer.

Before You Begin

You have an active call that needs to be transferred.

Procedure

Step 1
Press **Forward all** on any idle line from which you want to forward all calls.

Step 2
Enter the call forward target number exactly as you would dial it from your phone, or select an entry from your list of recent calls.

- Self Care Portal, on page 5
Conference Calls and Meetings

You can talk with several people in a single call. You can dial another person and add them to the call. If you have multiple phone lines, you can join two calls across two lines.

As the conference host, you can remove individual participants from the conference. The conference ends when all participants hang up.

Add Another Person to a Call (7811)

Procedure

Step 1 From an active call, press Conference.
Step 2 Add the other person to the call by doing one of the following:

• Press Calls, select a held call, and press Yes.
• Enter a phone number and press Conference.

Add Another Person to a Call (7821, 7841, 7861)

Procedure

Step 1 From an active call, press Conference.
Step 2 Add the other person to the call by doing one of the following:

• Select a held call and press Yes.
• Enter a phone number and press Conference.
Swap Between Calls Before You Complete a Conference

You can talk to a person before you add them to a conference. You can also swap between the conference call and the call with the other person.

**Procedure**

**Step 1**
Call a new conference participant, but do not add the participant to the conference. Wait until the call is connected.

**Step 2**
Press Swap to toggle between the participant and the conference.

View and Remove Conference Participants

If you created a conference, you can view the details of the last 16 participants who joined the conference. You can also remove participants.

**Procedure**

**Step 1**
While you are in a conference, press Details to view a list of participants.

**Step 2**
(Optional) Highlight a participant and press Remove to drop the participant from the conference.

Scheduled Conference Calls (Meet Me)

You can host or join a conference call at a scheduled time.

The conference call does not start until the host dials in and ends when all participants hang up. The conference does not automatically end when the host hangs up.

**Host a Meet Me Conference**

**Before You Begin**
Get a meet me phone number from your administrator, and distribute the number to the conference participants.

**Procedure**

**Step 1**
Lift the handset to get a dial tone and press Meet Me.

**Step 2**
Dial the meet me phone number.
Join a Meet Me Conference

You cannot join a meet me conference until the conference hosts dials in. If you hear a busy tone, the host has not dialed into the conference. Hang up and try your call again.

Procedure

Dial the meet me phone number that the conference host provides.

Intercom Calls

You can place and receive one-way calls using an intercom line.

Note

Cisco IP Phone 7811 does not support intercom.

When you place an intercom call, the recipient’s phone answers the call automatically with mute activated (whisper mode). Your message is broadcast through the recipient’s speakerphone, headset, or handset, if one of these devices is active.

After receiving the intercom call, the recipient can start two-way audio (connected mode) to allow for further conversation.

Make an Intercom Call

When you place an intercom call, your phone enters whisper mode until the recipient accepts the intercom call. In whisper mode, the other person can hear you, but you can’t hear them. If you are on an active call, that call is placed on hold.

Procedure

Step 1 Press Intercom.
Step 2 (Optional) Enter the intercom code.
Step 3 Listen for the intercom alert tone, and then begin speaking.
Step 4 Press Intercom to end the call.

Answer an Intercom Call

You can answer an intercom call to talk to the other person.

Before You Begin

You receive a message on your phone screen, and an audible alert. Your phone answers the intercom call in whisper mode.
Procedure
Step 1 Press Intercom to switch to connected mode. In connected mode, you can speak to the intercom caller.
Step 2 Press Intercom to end the call.

Supervise and Record Calls
You can supervise and record a call. But you must have a minimum of three people on a line: the person calling, the chaperone, and the person called.
The chaperone answers a call, creates a conference call, and monitors and records the conversation.
The chaperone performs the following tasks:
  • Record the call.
  • Conference in the first participant only; Other participants add people as needed.
  • End the call.
The conference ends when the chaperone hangs up the call.

Set up a Supervised Call
Procedure
Step 1 Answer an incoming call.
Record displays if the system determines that the call must be chaperoned and recorded.
Step 2 Press Conference to create a conference call.
Step 3 Enter the phone number for the supervisor and press Call.
Step 4 Press Conference when the supervisor answers.
Step 5 Press End Call to end the call.

Record a Call
You can record a call. You might hear a notification tone as you record the call.
Procedure
Press Record to start or stop recording.
Prioritized Calls

In your job, you might need to handle urgent or critical situations using your phone. You can identify calls as being very important, and thus have a higher priority than normal calls. The priorities range from level 1 (low) to level 5 (high). This system of priorities is called Multilevel Precedence and Preemption (MLPP).

Your administrator sets up the priorities that you can use and determines if you need special sign-in information.

When a high-priority call rings on your phone, you see the priority level on the phone screen and the call is at the top of the call list. If you are on a call when a high-priority call comes to your phone, the high-priority call preempts the current call and you hear a special preemption ringtone. You should hang up from your current call to answer the high-priority call.

When you are on a high-priority call, the priority of the call does not change when you:

- Put the call on hold
- Transfer the call
- Add the call to a three-way conference
- Answer the call using call pickup

<table>
<thead>
<tr>
<th>MLPP icon</th>
<th>Priority Level</th>
</tr>
</thead>
<tbody>
<tr>
<td>1</td>
<td>Level 1—Priority call</td>
</tr>
<tr>
<td>2</td>
<td>Level 2—Medium priority (Immediate) call</td>
</tr>
<tr>
<td>3</td>
<td>Level 3—High priority (Flash) call</td>
</tr>
<tr>
<td>4</td>
<td>Level 4—Flash Override</td>
</tr>
<tr>
<td>5</td>
<td>Level 5—Executive Override</td>
</tr>
</tbody>
</table>

Make a Priority Call

To make a priority call, you might need to sign in with your special credentials. You have three chances to enter these credentials, and you're notified if you've entered them incorrectly.
Answer a Priority Call

If you hear a special ring that's faster than usual, you are receiving a priority call.

Procedure

Press the flashing amber session button when you hear the special ringtone for a precedence call.

Answer a Priority Call While on Another Call

If you hear a continuous tone that interrupts your call, you or your coworker are receiving a priority call. Hang up immediately and let the higher priority call go to the intended person.

Procedure

Press Release or hang up the handset.
Your call ends, and the higher priority call rings on the appropriate phone.

Multiple Lines

If you share phone numbers with other people, you could have multiple lines on your phone. When you have multiple lines, you have more calling features available to you.

View All Calls on Primary Line

You can have a list of current and missed calls display on your primary line.
Use this feature if you have multiple lines and want to see all your calls - on all lines - displayed on a single screen. You can still filter for a specific line.
Your administrator sets up this feature.
Answer the Oldest Call First

You can answer the oldest call available on all your phone lines, including Hold Reversion and Park Reversion calls that are in an alerting state. Incoming calls always have priority over Held or Park Reversion calls.

When working with multiple lines, you typically press the line button for the incoming call you want to answer. If you just want to answer the oldest call regardless of line, press Answer.

View All Calls on the Phone

You can view a list of all your active calls — from all your phone lines — sorted in chronological order, oldest to newest. The list of all calls is useful if you have multiple lines or if you share lines with other users. The list displays all your calls together.

You can also display your active calls on your primary line, which is useful if you want all your calls displayed on a single screen.

Procedure

Press All Calls or the session button for your primary line.

Display Call Notifications on Select Lines with Line Filters

You can configure your phone so you are alerted when somebody calls a high priority phone number or line. For example, a senior executive's phone line or a customer help line. This tool is useful if you work with multiple phone lines and a high number of calls.

Depending upon how your administrator has configured your phone, you may be able to use a line filter during specific times of the day also.

Create a Line Filter

Procedure

Step 1 Press Applications.
Step 2 Select Settings > Call notifications > Add new filter.
The maximum number of custom filters is 20. If you have already created the maximum number of custom filters, delete a filter before continuing with this procedure.
Step 3 Press Select to make the text editable.
Step 4 Accept the default name for the new filter, or enter a new one.
Step 5 Select the lines to add to the new filter.
All available lines are displayed in the list. If you require a line that is not in the list, contact your administrator.
Step 6 Click Apply.
Step 7 To view the filter, press Back.

Use a Line Filter

Procedure

Step 1 Press Applications.
Step 2 Select Settings > Call notifications.
Step 3 Highlight the filter to apply and press Select.

Change a Line Filter

You can change the line filters that you control. Your administrator controls the All Calls filter and the Daily schedule filter.

Procedure

Step 1 Press Applications.
Step 2 Select Settings > Call notification.
Step 3 Highlight a filter and Press Edit to change an existing filter.

Shared Lines

You can share the same phone number with one or more of your coworkers. For example, as an administrative assistant, you might be responsible for screening calls for the person that you support.

When you share a phone number, you can use that phone line just like you would any other line, but you should be aware of a few special characteristics about shared lines:

- The shared phone number appears on all phones that share the number.
- If your coworker answers the call, the shared line button and the session button are solid red on your phone.
- If you put a call on hold, your line button is solid green and the session button pulses green. But your coworker's line button is solid red and the session button pulses red.
Add Yourself to a Call on a Shared Line

You or your coworker can join a call on the shared line. Your administrator needs to enable the feature on your phone.

**Procedure**

Step 1  Press the line button for the shared line or select the line and press Barge.

**Note**  You need to press Calls to add yourself to a call on a shared line.

Step 2  (Optional) Press Yes to add yourself to the call.

Enable Privacy on a Shared Line

Privacy prevents others who share your line from seeing information about your calls. Privacy applies to all shared lines on your phone. If you have multiple shared lines and Privacy is enabled, others cannot view any of your shared lines.

If the phone that shares your line has Privacy enabled, you can make and receive calls using the shared line as usual.

Visual confirmation displays on your phone screen for as long as the feature is enabled.

**Procedure**

Step 1  Press Privacy to enable the feature.

Step 2  Press Privacy again to turn off the feature.

Phone Calls with Mobile Connect

You can use your mobile phone to handle calls that are associated with your desk phone number. This service is called Mobile Connect.

You associate your mobile phone with your desk phone in the Self Care portal, as an additional phone. You can control which calls are sent to your mobile phone.

When you enable additional phones:

- Your desk phone and your additional phones receive calls simultaneously.
- When you answer the call on your desk phone, the additional phones stop ringing, disconnect, and display a missed call message.
- When you answer the call on one additional phone, the other additional phones and desk phone stop ringing and disconnect. A missed call message shows on the other additional phones.
You can answer the call on an additional phone and switch the call to a desk phone that shares the line. If you do so, the desk phones that share the same line display a Remote In Use message.

Sign in and Out of a Personal Directory

Before You Begin

Before you can sign in to your personal directory, you need your user ID and PIN. Contact your administrator if you don't know this information.

Procedure

Step 1 Press Contacts.
Step 2 Select Personal directory.
Step 3 Enter your user ID and PIN, and press Submit.
Step 4 To sign out, select Log out, press Select, and then press OK.

Add a New Contact to Your Personal Directory

Procedure

Step 1 Press Contacts.
Step 2 Sign in to your personal directory.
Step 3 Select Personal Address Book.
Step 4 Press Submit.
Step 5 Press New.
Step 6 Enter first name, and a last name.
Step 7 (Optional) Enter a nickname.
Step 8 Press Phones and enter the phone number along with any required access codes.
Step 9 Press Submit.
Search for a Contact in Your Personal Directory

Procedure

Step 1  Press Contacts.
Step 2  Sign in to your personal directory.
Step 3  Select Personal Address Book.
Step 4  Select a search criteria.
Step 5  Enter your search criteria and press Submit.

Call a Contact in Your Personal Directory

Procedure

Step 1  Press Contacts.
Step 2  Sign in to your personal directory.
Step 3  Select your Personal directory and search for an entry.
Step 4  Select the personal address book entry that you want to dial.
Step 5  Select the required fast-dial code and press Dial.

Assign a Fast-Dial Code to a Contact

You can make it easier to call a contact with a fast-dial code.
**Call a Contact with a Fast-Dial Code**

**Procedure**

1. Press **Contacts**.
2. Sign in to your personal directory.
3. Select **Personal Fast Dials** and scroll to a fast-dial code.
4. Select the required fast-dial code and press **Dial**.

**Edit a Contact in Your Personal Directory**

**Procedure**

1. Press **Contacts**.
2. Sign in to your Personal directory.
3. Select **Personal address book** and search for an entry.
4. Press **Select**.
5. Press **Edit**.
6. Modify the entry information.
7. Press **Phones** to modify a phone number.
8. Press **Update**.
Remove a Contact from Your Personal Directory

Procedure

Step 1  Press **Contacts**.
Step 2  Sign in to your personal directory.
Step 3  Select **Personal Address Book** and search for an entry.
Step 4  Press **Select**.
Step 5  Press **Edit**.
Step 6  Press **Delete**.
Step 7  Press **OK** to confirm the deletion.

Delete a Fast Dial Code

Procedure

Step 1  Press **Contacts**.
Step 2  Sign in to your personal directory.
Step 3  Select **Personal Fast Dials** and search for a fast-dial code.
Step 4  Select the required code and press **Remove**.
Step 5  Select the index and press **Remove**.

Cisco Web Dialer

You can use Cisco Web Dialer, a web browser, and your Cisco IP phone to make calls from web and desktop applications. Use your web browser and go to a website or your company directory, and then click a hyperlinked phone number to begin your call.

You need a user ID and password to make a call. Your administrator can give you this information. First-time users have to configure their preferences before a call.

Recent Calls

• Recent Calls Lists, page 47
• View Your Recent Calls, page 47
• Return a Recent Call, page 48
• Clear the Recent Calls List, page 48
• Delete a Call Record, page 48

Recent Calls Lists

You use the Recents lists to see the 150 most recent individual calls and call groups. If your phone has multiple lines, your administrator can set up the Recents list so that calls on all lines are in one list. Calls in the Recents list are grouped if they are to and from the same number and are consecutive. Missed calls from the same number also get grouped.

View Your Recent Calls

Procedure

Step 1
Press Applications.

Step 2
Scroll and select Recents.

Step 3
Select a line to view.
Return a Recent Call

Procedure

Step 1  Press **Applications**.
Step 2  Select **Recents**.
Step 3  (Optional) If multiple lines exist, select **All Lines** or the required line.
Step 4  Select the call record that you want to dial.
Step 5  (Optional) Press **EditDial** to edit the call record.
Step 6  Press **Call**.

Clear the Recent Calls List

Procedure

Step 1  Press **Applications**.
Step 2  Select **Recents**.
Step 3  (Optional) Select **All Lines** or the required line.
Step 4  Press **Clear**.
Step 5  Press **Delete**.

Delete a Call Record

Procedure

Step 1  Press **Applications**.
Step 2  Select **Recents**.
Step 3  (Optional) Select **All Lines** or the required line.
Step 4  Highlight the individual call record or call group that you want to delete.
Step 5  Press **Delete** to delete an individual call record or all calls in a group.
Step 6  Press **Delete** again to confirm.
Step 7  Press **Back**.
Delete a Call Record
Voicemail

- Your Voicemail Account, page 51

Your Voicemail Account

You can access your voice messages directly from your phone. But your administrator must set up your voicemail account and phone.

Because each voicemail system is different, we don't have the details about how to use your voicemail once you access it from the phone. For information about the commands that your voicemail system supports, see the voicemail system user documentation.

New Message Indicators

To find out if you have new voicemail messages, look for one of the following signs:

- The light strip on your handset is a solid red.
- The number of missed calls and voicemail messages displays on your screen. If you have more than 99 new messages, a plus (+) sign is displayed.

You could also hear a stutter tone played from your handset, headset, or speakerphone when you use a phone line. This stutter tone is line-specific. You only hear it when using a line that has voice messages.

Related Topics

Self Care Portal, on page 5
Access Voicemail

Procedure

Step 1 Press Messages.
Step 2 Follow the voice prompts.

Access Audio Voicemail

Depending upon how your administrator has set up your phone, you can retrieve your voicemail without viewing a list of messages. This option is useful if you prefer a list of voicemail messages, but you occasionally access your messages without the visual prompts.

Procedure

Step 1 In the screen, press the Audio softkey.
Step 2 When prompted, enter your voicemail credentials.

- Switch to Active Applications, page 54
- Close Active Applications, page 54

Available Applications

Cisco phones don't include these applications by default. But your company might have added applications such as the weather, stock information, company news, to-do lists, or similar information and services.

View Active Applications

Procedure

Step 1 Press Applications.
Step 2 Select Running applications.
Step 3 Press Exit.
## Switch to Active Applications

**Procedure**

<table>
<thead>
<tr>
<th>Step 1</th>
<th>Press Applications.</th>
</tr>
</thead>
<tbody>
<tr>
<td>Step 2</td>
<td>Select Running applications.</td>
</tr>
<tr>
<td>Step 3</td>
<td>Select a running application and press Switch to to open and use the selected application.</td>
</tr>
<tr>
<td>Step 4</td>
<td>Press Exit.</td>
</tr>
</tbody>
</table>

## Close Active Applications

**Procedure**

<table>
<thead>
<tr>
<th>Step 1</th>
<th>Press Applications.</th>
</tr>
</thead>
<tbody>
<tr>
<td>Step 2</td>
<td>Select Running applications.</td>
</tr>
<tr>
<td>Step 3</td>
<td>Select a running application and press Close app to close the application.</td>
</tr>
<tr>
<td>Step 4</td>
<td>Press Close.</td>
</tr>
<tr>
<td>Step 5</td>
<td>Press Exit.</td>
</tr>
</tbody>
</table>
Settings

- Change the Ringtone, page 55
- Adjust the Contrast, page 56
- Adjust the Headset Feedback, page 56
- Adjust the Phone Screen Backlight, page 56
- Adjust the Volume in a Call, page 57
- Adjust the Ringtone Volume, page 57

Change the Ringtone

Procedure

- **Step 1** Press Applications.
- **Step 2** Select Settings > Ringtone.
- **Step 3** Select a line.
- **Step 4** Scroll through the list of ringtones and press Play to hear a sample.
- **Step 5** Press Set and Apply to save a selection.
Adjust the Contrast

Procedure

<table>
<thead>
<tr>
<th>Step 1</th>
<th>Press Applications.</th>
</tr>
</thead>
<tbody>
<tr>
<td>Step 2</td>
<td>Select Settings &gt; Contrast.</td>
</tr>
<tr>
<td>Step 3</td>
<td>Press the Navigation cluster left to decrease, or right to increase the contrast.</td>

<tr>
<td>Step 4</td>
<td>Press Save to set the contrast.</td>
</tr>
</tbody>
</table>

Adjust the Headset Feedback

When you use a headset, you can hear your own voice in the earpiece, which is called headset sidetone or headset feedback. You can control the amount of headset sidetone on your phone.

Procedure

<table>
<thead>
<tr>
<th>Step 1</th>
<th>Press Applications.</th>
</tr>
</thead>
<tbody>
<tr>
<td>Step 2</td>
<td>Select Settings &gt; Headset sidetone.</td>
</tr>
<tr>
<td>Step 3</td>
<td>Select a setting.</td>
</tr>
<tr>
<td>Step 4</td>
<td>Press Back.</td>
</tr>
</tbody>
</table>

Adjust the Phone Screen Backlight

You can adjust the backlight to make the phone screen easier to read in your ambient light conditions. The Cisco IP Phone 7811 does not have a backlight.

Procedure

<table>
<thead>
<tr>
<th>Step 1</th>
<th>Press Applications.</th>
</tr>
</thead>
<tbody>
<tr>
<td>Step 2</td>
<td>Choose Preferences &gt; Backlight.</td>
</tr>
<tr>
<td>Step 3</td>
<td>Press Edit to change the backlight mode.</td>
</tr>
<tr>
<td>Step 4</td>
<td>Press On to turn the backlight on or press Off to turn the backlight off.</td>
</tr>
<tr>
<td>Step 5</td>
<td>Press to exit.</td>
</tr>
</tbody>
</table>
Adjust the Volume in a Call

**Procedure**

Press Volume up and down to adjust the handset, headset, or speakerphone volume when the phone is in use.

Adjust the Ringtone Volume

**Procedure**

Press Volume up and down to adjust the ringer volume when the phone is not in use.
Adjust the Ringtone Volume

Supported Accessories

The Cisco IP Phone 7800 Series supports both Cisco and third-party accessories.

In the following table, an X indicates support for an accessory by a particular phone model and a dash (-) indicates no support.

<tr>
<td>4</td>
<td>Press <strong>Exit</strong>.</td>
</tr>
</tbody>
</table>

**Headsets**

If you plug a headset into the phone during an active call, the audio path automatically changes to the headset.

**Standard Headsets**

Standard headsets plug into the back of the phone with an RJ-11 connector.

**Connect a Standard Headset**

**Procedure**

Plug the headset into the jack in the back of the phone and press the cable into the cable channel.
What to Do Next

If your standard headset supports wideband audio, you must perform Set Up a Wideband Standard Headset, on page 61.

Set Up a Wideband Standard Headset

You can use a headset that supports wideband audio. Wideband audio improves the quality of the sound you hear in the headset.

Procedure

<table>
<thead>
<tr>
<th>Step</th>
<th>Action</th>
</tr>
</thead>
<tbody>
<tr>
<td>Step 1</td>
<td>Press Applications.</td>
</tr>
<tr>
<td>Step 2</td>
<td>Select Accessories &gt; Analog headset &gt; Setup.</td>
</tr>
<tr>
<td>Step 3</td>
<td>Press On or Off to enable or disable wideband for the analog headset.</td>
</tr>
<tr>
<td>Step 4</td>
<td>Press Return.</td>
</tr>

- Important Online Information, page 65

Safety and Performance Information

Power Outage

Your access to emergency service through the phone requires that the phone receive power. If a power interruption occurs, service or emergency calling service dialing does not function until power is restored. If a power failure or disruption occurs, you may need to reset or reconfigure the equipment before you can use service or emergency calling service dialing.

External Devices

We recommend that you use good-quality external devices that are shielded against unwanted radio frequency (RF) and audio frequency (AF) signals. External devices include headsets, cables, and connectors.

Depending on the quality of these devices and their proximity to other devices, such as mobile phones or two-way radios, some audio noise may still occur. In these cases, we recommend that you take one or more of these actions:

- Move the external device away from the source of the RF or AF signals.
- Route the external device cables away from the source of the RF or AF signals.
- Use shielded cables for the external device, or use cables with a better shield and connector.
- Shorten the length of the external device cable.
- Apply ferrites or other such devices on the cables for the external device.
Cisco cannot guarantee the performance of external devices, cables, and connectors.

Caution
In European Union countries, use only external speakers, microphones, and headsets that are fully compliant with the EMC Directive [89/336/EC].

Power Information
Use an Ethernet cable to connect your phone to your LAN and enable full functionality of your phone. If your Ethernet port is equipped with Power over Ethernet (PoE), your phone can be powered through the LAN port. Do not extend the LAN Ethernet cable outside the building.

Phone Behavior During Times of Network Congestion
Anything that degrades network performance can affect Cisco IP Phone voice and video quality, and in some cases, can cause a call to drop. Sources of network degradation can include, but are not limited to, the following activities:

- Administrative tasks, such as an internal port scan or security scan
- Attacks that occur on your network, such as a Denial of Service attack

FCC Compliance Statements
The Federal Communications Commission requires compliance statements for the following:

FCC Part 15.21 Statement
Changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.

FCC RF Radiation Exposure Statement
This equipment complies with FCC radiation exposure limits set forth for an uncontrolled environment. End users must follow the specific operating instructions for satisfying RF exposure compliance. This transmitter must be at least 20 cm from the user and must not be collocated or operating in conjunction with any other antenna or transmitter.

FCC Receivers and Class B Digital Statement
This product has been tested and complies with the specifications for a Class B digital device, pursuant to Part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses, and can radiate radio frequency
energy and, if not installed and used according to the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation.

If this equipment does cause harmful interference to radio or television reception, which is found by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna
- Increase the separation between the equipment or devices
- Connect the equipment to an outlet other than the receiver's
- Consult a dealer or an experienced radio/TV technician for assistance

**Cisco Product Security Overview**

This product contains cryptographic features and is subject to U.S. and local country laws that govern import, export, transfer, and use. Delivery of Cisco cryptographic products does not imply third-party authority to import, export, distribute, or use encryption. Importers, exporters, distributors, and users are responsible for compliance with U.S. and local country laws. By using this product, you agree to comply with applicable laws and regulations. If you are unable to comply with U.S. and local laws, return this product immediately.

Further information regarding U.S. export regulations can be found at [http://www.bis.doc.gov/policiesandregulations/ear/index.htm](http://www.bis.doc.gov/policiesandregulations/ear/index.htm).
